Profile

Hi! I'm Becky, a developer who enjoys exploring new technologies and values efficiency.Recently, I've been focusing on leveraging AI to make development more creative and efficient.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL
Frontend: React, Next.js, Electron, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, RESTful API, JWT
Database: PostgreSQL, MySQL, Drizzle ORM
DevOps & Tools: GitHub, Docker, CI/CD, Grafana

Work Experience

Wistron ITS (MediaTek Project) Software Engineer | May 2026 – Present

- MTBF Problem Solving (Internal AI Desktop Tool)
  - Reduced MTBF troubleshooting time by approximately 70% by building an AI-powered desktop application with searchable knowledge retrieval and streaming chat.
  - Improved development and maintenance efficiency by approximately 40% by refactoring a legacy application into a modular frontend/backend architecture.
  - Established CI/CD quality gates with ESLint, 70% code coverage, dependency scanning, and end-to-end testing to improve release reliability.
  - Improved tester self-service efficiency by approximately 50% by creating 15+ knowledge-base articles and standardizing workflows across 20+ failure cases.

MediaTek Software Engineer | Nov 2024 – Nov 2025

- AI Productivity Platform
  - Improved frontend response performance by approximately 15% by optimizing React and Next.js interfaces and API interactions.
  - Achieved 99% login success and 98% authorization accuracy by implementing token-based authentication and role-based access control.
  - Improved platform maintenance efficiency by approximately 50% by developing an AI administration system for model configuration and management.
  - Reduced operational issue reports by approximately 40% through standardized workflows, reusable components, and RESTful API design.

project

- AI Platform
- Context-Aware Restaurant Recommendation System

Eduaction

National Changhua University of Education — M.S. in Information Management （Ranked 1）

- Master's Thesis: Context-Aware Restaurant Recommendation System
